

AUTOMATION COMPONENTS, INC.

Company Overview

# 01 BOWLING OUTING

Every year, ACI comes together as one to participate in a company-wide bowling outing. All proceeds go towards the UW Carbone Cancer Center. \$100,000 has been donated to date.

# 02 THE ACI OPEN

ACI also gathers together every year to engage in a fun-filled day of golf! ACI's Employees donate to the Second Harvest Foodbank and walk away with wonderful prizes and memories.

# 03 MAKING A DIFFERENCE

ACI also partners with Habitat for Humanity. Habitat for Humanity is an international nonprofit organization dedicated to breaking the cycle of poverty housing.

# 04 BUILDING WITHIN

ACI promotes within it's own company. Pete Defere started working for ACI in 1993 as a production worker and climbed his way to become Production Manager in 1998.

AUTOMATION COMPONENTS, INC.  
[www.workaci.com](http://www.workaci.com)

ACI has been a high quality manufacturer of sensors to the HVAC Industry since 1991. We have accumulated several State and Industry related awards since our inception. Our company motto is "Engineering a Better Sensor Solution" and it the focal point of each department at ACI.

ACI's motto is "Engineering a Better Sensor Solution". This company-wide philosophy begins with our engineering department and is followed all the way through to our sales and technical service departments. We realize that invention and communication go hand in hand. For instance, our sales department has an ongoing technical training program which includes testing and certification to better assist our customers. Additionally, our technical service department has over 40 years of combined experience in the HVAC Industry.

ACI takes great pride in our engineering achievements. We have invested substantially in new product developments, as well as existing product enhancements. We are confident that our engineering staff is one of the best in our Industry. The ACI Engineering Staff is comprised of four full-time engineers, one full time draftsman with an engineering background, and two full-time technical assistants. This hard working and devoted group stays up-to-date on control system applications through research, communication with our OEM partners, and by addressing questions from our existing customers.

Recently ACI purchased an additional facility to showcase ACI's more technologically advanced product lines. The facility is not only designed to provide the optimal environment for our manufacturing processes, it provides a great picture of the teamwork and commitment our staff has to producing a quality product.

It might sound like a cliché but we feel that our products are only as strong as our weakest link. So ACI's prioritizes a team approach in fulfilling our promise to "Engineer a Better Sensor Solution". Value sets you apart from your competition and we feel our company motto describes our commitment to provide value on many different levels. We hope you give us the opportunity to prove this to you in the future.

Regards,

Troy A. Schwenn
