FAST TUBES = FASTER INSTALL!

QUICK & EASY ALTERNATIVE TO METAL TUBES

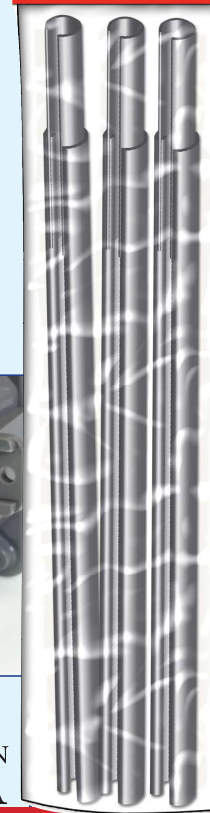

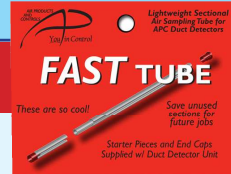

A **FAST TUBE** starter section is included with every APC duct detector - this piece provides proper seating within the detector housing.

Slide together any number of 24" **FAST TUBE** sections to length, completing the assembly with the red-ended starter piece. Insert the supplied end cap at the far end of the assembled tube, and fit the tube to the detector housing following the detector's installation instructions.

At the detector, orient the tube so that the slot-opening faces the direction of airflow.

MADE IN USA

Give Installing Contractors a Choice!

Our product team is always asking installers what they wish was different about the duct smoke detectors they install in the course of daily business. Again and again, we heard complaints about metal sampling tubes.

"The sample tubes are always dirty and the sharp edges nick my hands."

"I rarely have the right length sample tubes when I'm at the job site. Now I buy them longer to cut down, knowing I'll throw away almost half a tube per install. Such a waste of money!"

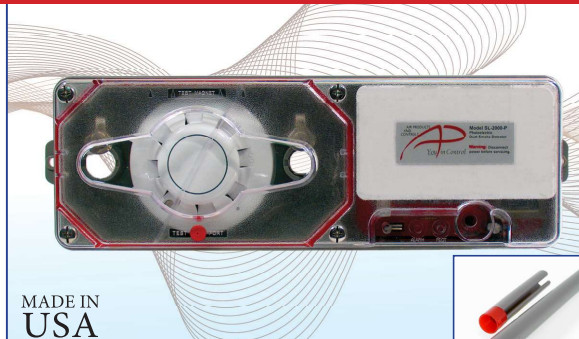

"The tubes at my favorite distributor are stored out back in the warehouse. When I'm making a pickup or send someone for my parts, I usually end up making a second trip because we forgot to get the stupid sampling tubes..."

DUCT DETECTORS CONTAINING FAST TUBE STARTER SECTIONS

RT-3000 SERIES

NEMA 4X Rated for Outdoor Corrosive Environments
No Tools One-Piece Cover • Timed Maintenance Mode
Trade-Dedicated Terminal Blocks • Smoke Test Port
Full Range Voltage Input • Ion or Photoelectric

SL-2000 SERIES

4-Wire Conventional • No-Tools Thumbscrews
One-Piece Cover • Extra Set of Relay Contacts
On-Board Wiring Diag • Full Range Voltage Input
Smoke Test Port • Ion or Photoelectric

SM-501 SERIES

4-Wire Conventional
Vertical Style with Metal Back • Ample Room for Wiring • Ion or Photo

FAST TUBE SECTIONAL AIR SAMPLING TUBES ARE UL LISTED FOR USE ONLY WITH APC DUCT DETECTOR PRODUCTS
