# SW1
Electric to Pneumatic Fail-Safe

The SW1 is a three-way pneumatic solenoid valve activated by a 24 VDC or VAC electric signal. The miniature valve is light weight, energy efficient, and capable of continuous duty. The LED indicates power to the valve. The valve is equipped with two plastic barbs and one metal barb, all of which accept 5/32" OD polyethylene or PVC tubing. A jumper shunt is mounted in series with the incoming power to allow local OFF override.

Applications: Pneumatic Actuators, Used as Fail-safe Control, Electrical to Pneumatic Switch (ON/OFF), Pneumatic Logic Circuit

The SW1 is covered by ACI's Two (2) Year Limited Warranty, which is located in the front of ACI's Sensors & Transmitters catalog or can be found on ACI's website, which is: www.workaci.com.
